CONSTRUCTION MANAGEMENT AT RISK SERVICES
NO. 2026-043

Johnson County Wastewater (JCW), a department of Johnson County, Kansas Government, plans to issue a Request for Qualifications (RFQ) No. 2026-043 on November 12, 2026, for Construction Management at Risk (CMAR) Services for the Digester & Solids Improvements Project at the Douglas L. Smith Middle Basin Wastewater Treatment Facility (WWTF) located at 10001 College Blvd in Overland Park, Kansas. On October 8, 2026, the Board of County Commissioners held a public hearing regarding the use of collaborative delivery for the Project and authorized the use of a three-phase selection process for the use of CMAR. As part of the first phase of this approved process, JCW is publishing the notice of the RFQ at least 15 days prior to the commencement of such request in the newspaper.

The Project is needed due to aging infrastructure and limited capacity concerns. There are several improvements identified but the primary scope items generally consist of the following:

- Digester Rehabilitation and Improvements (including the conversion of a secondary digester to a primary digester, a new Digested Sludge Storage Tank (DSST), and rehabilitation of the existing digesters, digester building, and associated equipment)
- New Dewatering Building and associated equipment

More information on the project, including the facility plan used to plan for the project, can be found at the website below:

https://www.jcwprogram.com/outreach/future-projects

The RFQ will be posted on IonWave at https://jocogov.ionwave.net/Login.aspx under "Current Bids" on November 12, 2026. Additional details and schedules will be made available in the RFQ. You must register as a supplier with IonWave to submit a statement of qualifications and are encouraged to do so at least two (2) business days prior to closing to ensure a successful registration.
